DRK EPIC (09430)

Epic is a broadly adapted dark red kidney bean variety ideally suited to Minnesota and the High Plains production regions. Epic has been a good performer throughout the trialing process, and has performed well in the NDSU, Nebraska dry bean trials; as well as strip trials in Minnesota.

Preliminary data shows Epic with a yield advantage of 40 lbs./AC*. over Montcalm. Assuming a 40 lbs./AC yield increase over Montcalm, profit would increase $20/AC on $50/cwt. Beans. This would amount to $2,000 for 100 AC of production.

Epic has also shown yield advantages over Red Hawk (382 lbs./AC advantage) and Red Rover (271 lbs./AC advantage) as well over 6 yr./locations of data.

- Matures 101-105 days or about the same maturity as Montcalm**
- Approximate seed count is 811 sds./lb.***
- Good seed appearance and shape.
- Epic has demonstrated average canning characteristics similar to Montcalm.
- Preliminary testing has shown that the Epic has resistance to bean common mosaic virus (BCMV). Early data from the CSU rust screening nursery has shown that Epic may tolerate Rust a little better than Montcalm.
